- 11 WHEN WILL YOU TEST THE HEALTH OPTIMIZER?

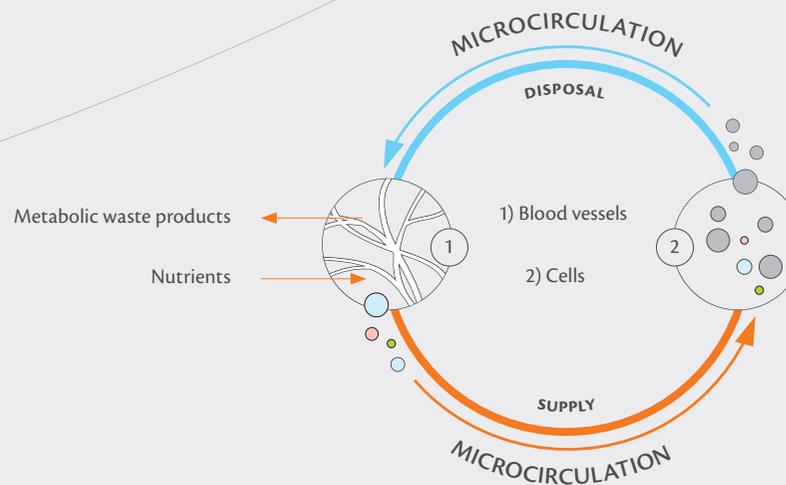

## VITAL: MICROCIRCULATION

Microcirculation is functionally a very important part of human blood circulation. This occurs in the fine and very widely distributed network of the small and smallest blood vessels, the so-called microvessels. The area of microcirculation covers **74% OF THE ENTIRE CIRCULATORY SYSTEM**, where it fulfills vital transport and supply activities. It supplies 80 to 100 trillion cells in the body with oxygen and nutrients and is an important pathway for the disposal of metabolic waste products. Reduced microcirculation can cause or fuel many health complaints and diseases. This makes it even more

amazing that there has been no satisfactory treatment option for improving reduced microcirculation to date. Functioning microcirculation is a basic prerequisite for all processes that take place in the human body: regeneration, repair, growth and healing processes. It is essential for the provision of energy for physical and mental performance. **ONLY IF THE CELLS GET WHAT THEY NEED CAN THEY ALSO DO WHAT THEY ARE SUPPOSED TO DO.**

### THE SUPPLY AND DISPOSAL CYCLE

**CORRECT SUPPLY OF THE CELLS** with oxygen and nutrients and **DISPOSAL** of the metabolic waste products means **HEALTH.**

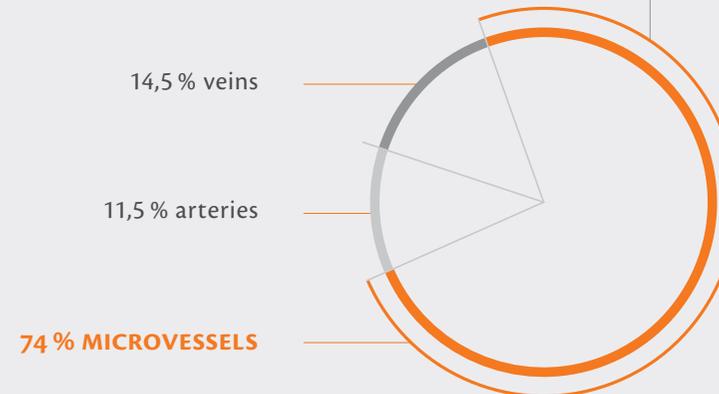

## PREREQUISITE FOR HEALTH

Microcirculation is thus the only network of pathways for the supply and disposal of somatic cells. It makes up three quarters of our entire blood circulation and is a **BASIC PREREQUISITE** for all of the body's metabolic processes. In this context it is clear what a **CRUCIAL ROLE** this network of the smallest blood vessels plays in disease and health.

THE DIAGRAM SHOWS  
THE **PERCENTAGES** OF THE  
**DIFFERENT VESSEL SEGMENTS**

About  $\frac{3}{4}$  of all blood  
vessels in our body  
are microvessels!

## MICROCIRCULATORY IMPAIRMENT

Microcirculation also follows the law of life and decreases with aging. This process is accelerated in many people, however, due to harmful environmental influences, bad habits and an unhealthy lifestyle. Environmental pollutants, noise, stress, too little sleep and exercise, an unhealthy or unbalanced diet, nicotine and alcohol consumption all have a negative effect on microcirculation.

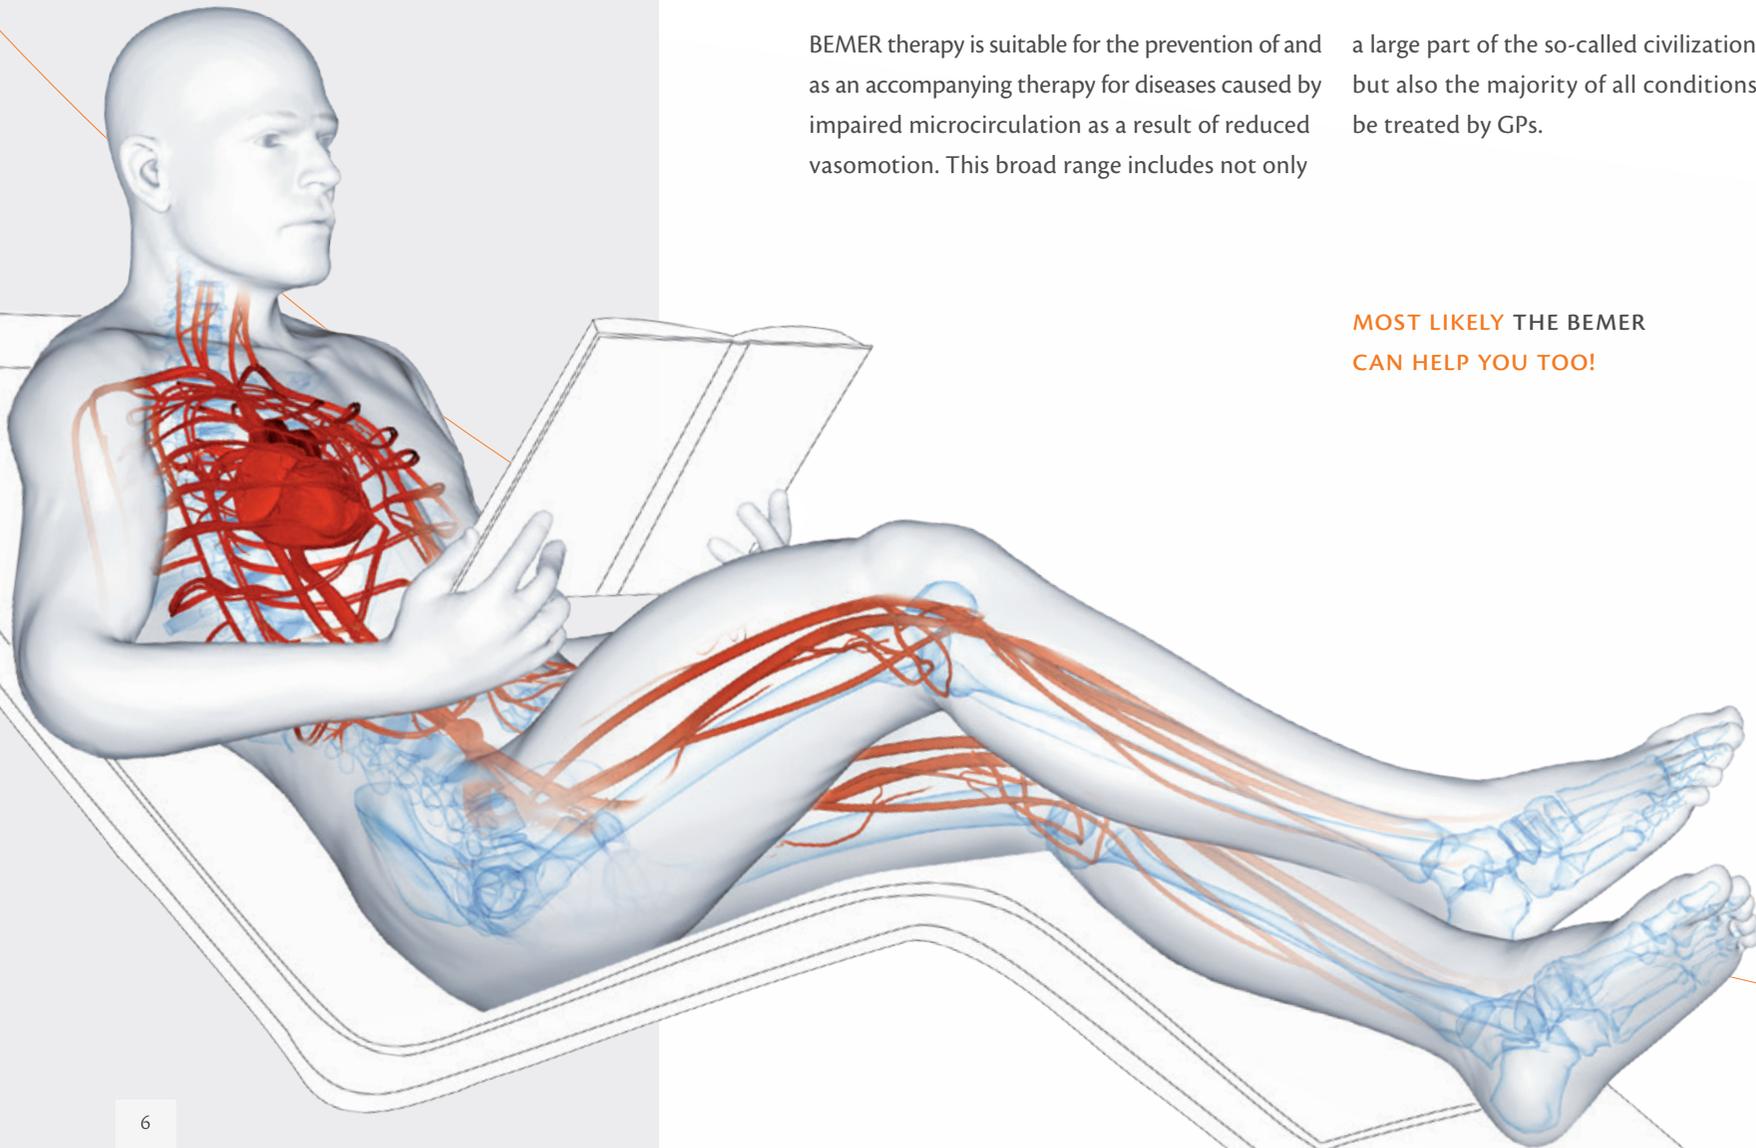

**THE RESULTS:** A weakening of the immune system, increased susceptibility to infections, reduced performance, health complaints, delayed recovery and ultimately an increased likelihood of vascular diseases like heart attacks and strokes.

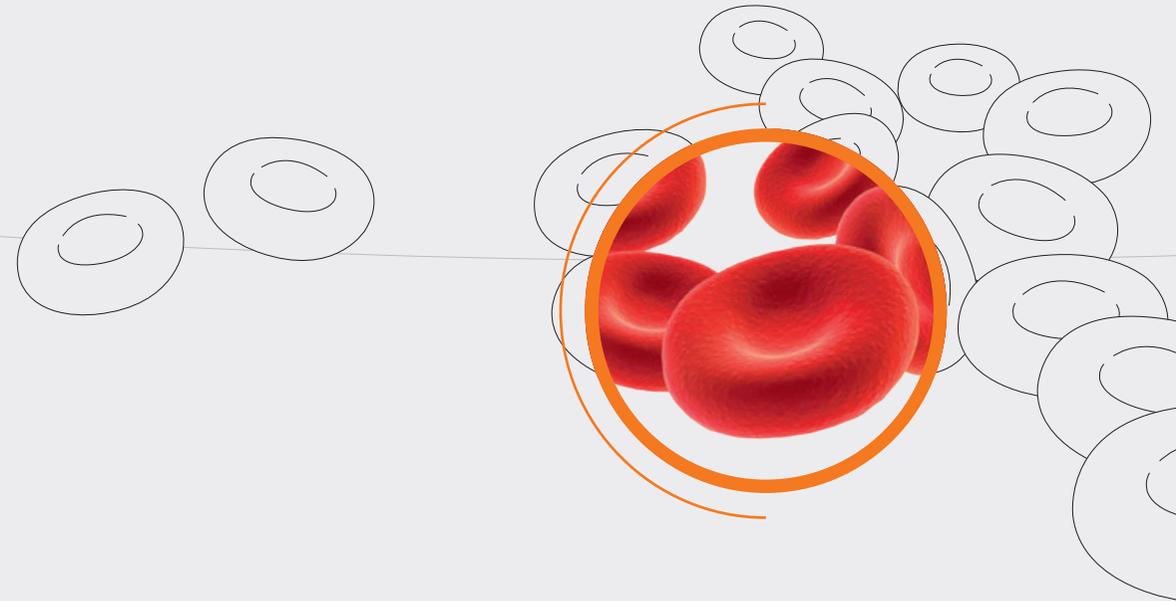

## THE TREATMENT METHOD FOR THE WHOLE BODY

BEMER therapy is suitable for the prevention of and as an accompanying therapy for diseases caused by impaired microcirculation as a result of reduced vasomotion. This broad range includes not only

a large part of the so-called civilization ailments but also the majority of all conditions that can be treated by GPs.

**MOST LIKELY THE BEMER  
CAN HELP YOU TOO!**

## BEMER AFFECTS THE CORE FOR HEALTH AND WELL-BEING

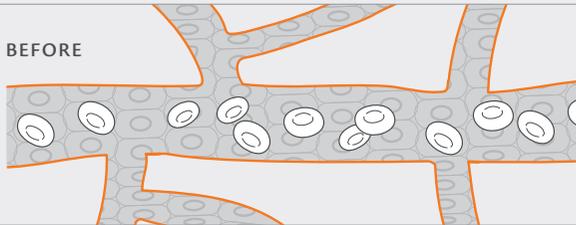

Vasomotion describes the “pumping movements” of the smallest blood vessels for the needs-based distribution of the blood in microcirculation. Physical and mental performance, healing and recovery processes as well as **A LARGE NUMBER OF DISEASES** are

directly linked to microcirculation and microsupply. BEMER stimulates **reduced vasomotion in a targeted way, thereby causing an improvement in microcirculation.**

### RESTRICTED BLOOD DISTRIBUTION WITHOUT BEMER

means poorer supply of nutrients and insufficient removal of metabolic waste products.

BEFORE

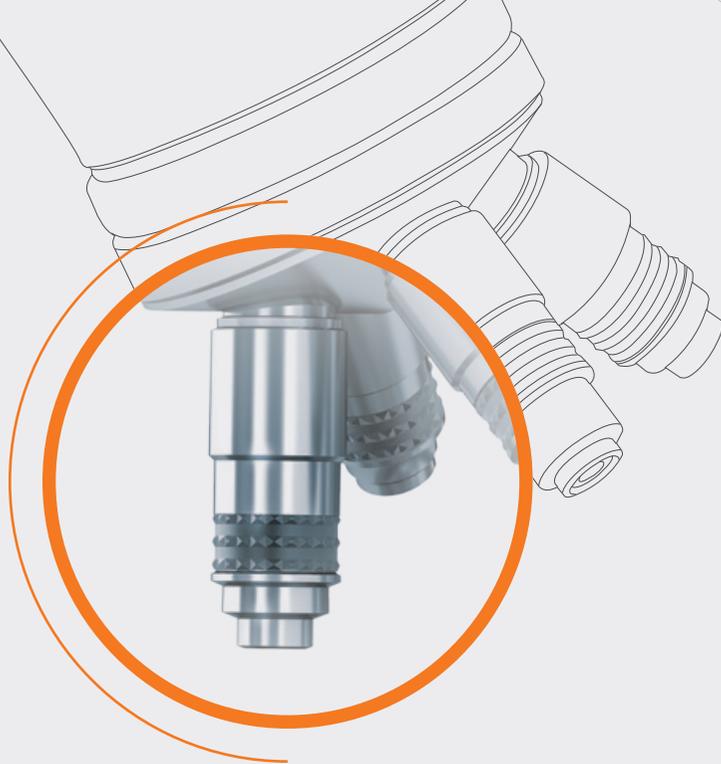

### CONSIDERABLY BETTER BLOOD DISTRIBUTION WITH BEMER

means better supply of nutrients and removal of metabolic waste products.

AFTER

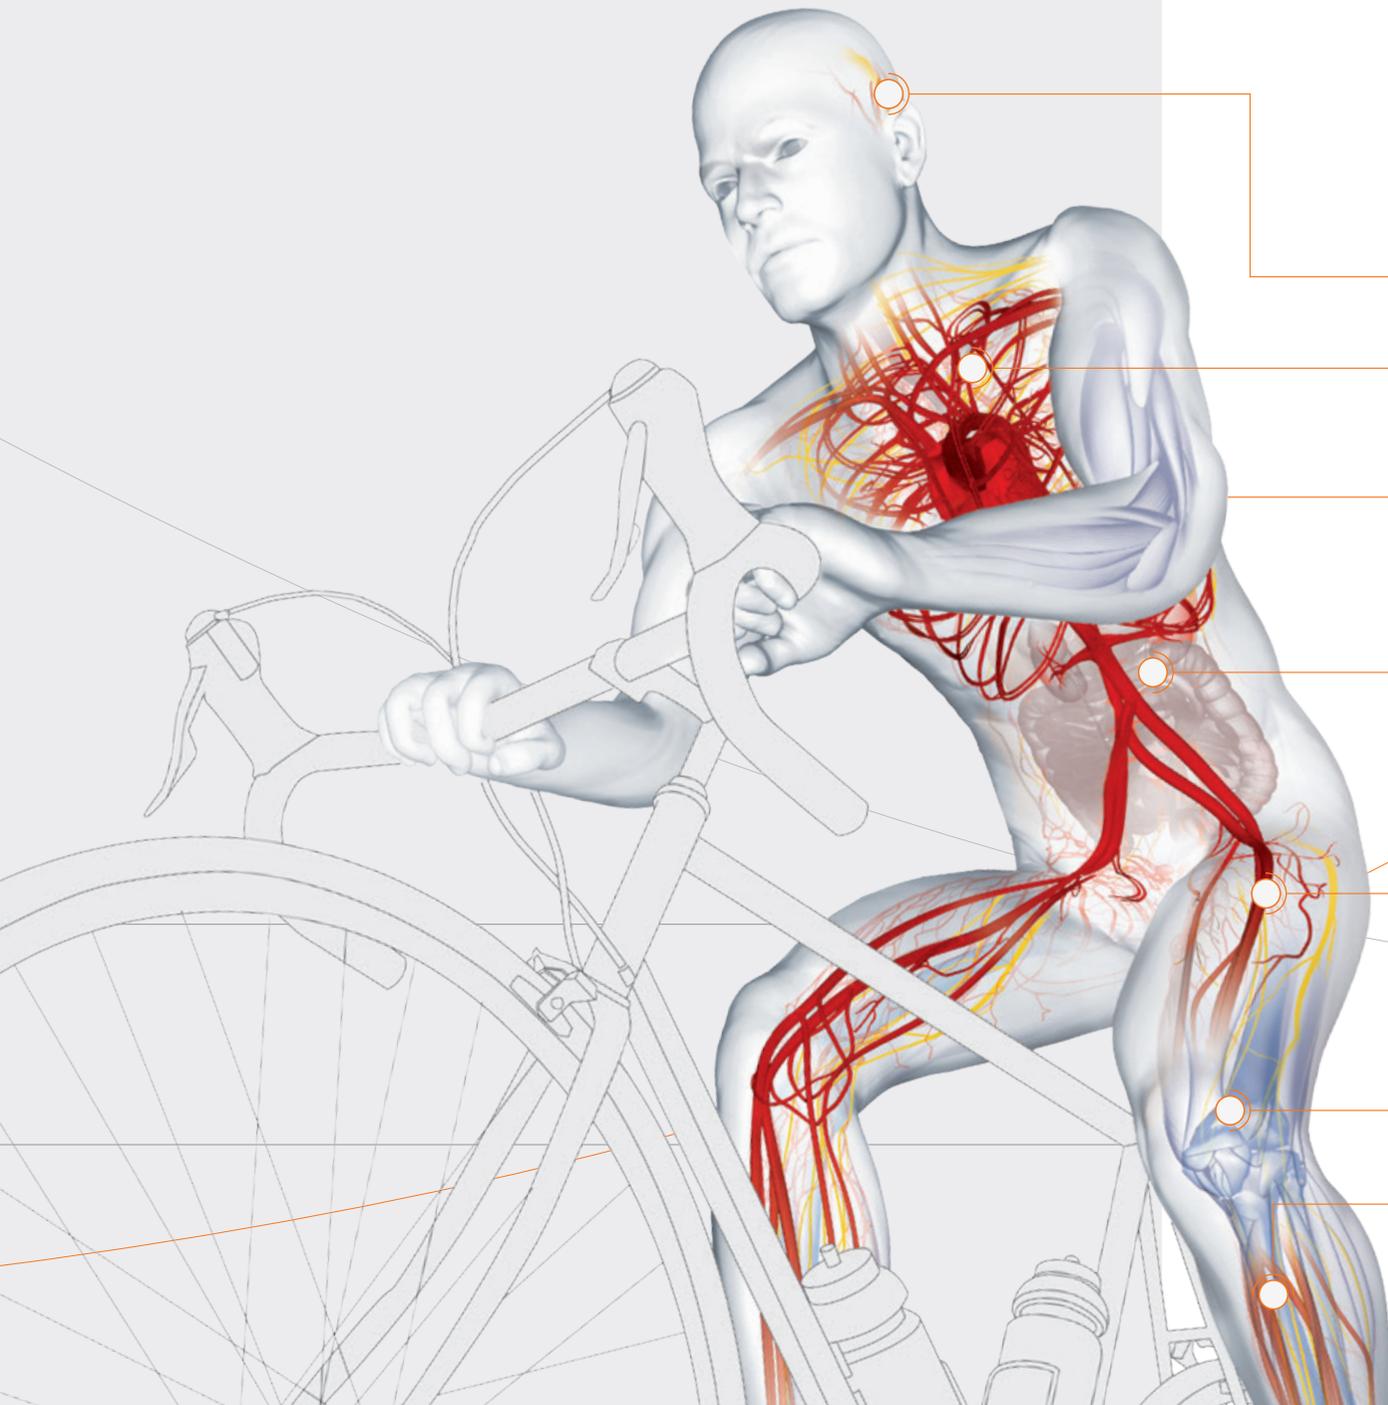

## SCIENTIFICALLY PROVEN

Since the company was founded in 1998, many thousands of patients have participated in observational studies and trials. These were described clearly and in detail in the 2014 clinical evaluation report. On this basis there are currently **MANY INDICATION AREAS** in which Physical Vascular Therapy BEMER® has proven its relevance.

**PROVEN** AT THE INSTITUTE FOR  
MICROCIRCULATION BERLIN:

- 27 %** ACCELERATED VASOMOTION
- 29 %** BETTER BLOOD DISTRIBUTION IN CAPILLARY NETWORK
- 31 %** STRONGER VENOUS RETURN
- 29 %** HIGHER OXYGEN SATURATION

The above-mentioned values are the maximum figures after 30 days of treatment.

## **SUCCESSFUL** APPLICATION FOR:

**CHRONIC FATIGUE**

**POLYNEUROPATHY DUE TO DIABETES MELLITUS**

**PERIPHERAL VASCULAR DISEASES**

**CHRONIC METABOLIC DISORDER**

**CHRONIC PAIN**

**CHRONIC DEGENERATIVE DISEASES  
OF THE MUSCULOSKELETAL SYSTEM**

**CHRONIC WOUND HEALING DISORDERS**

## COMFORTABLE AND TIMELY 16 MINUTES FOR YOUR HEALTH

Physical Vascular Therapy BEMER® is easy to use and for everyone. It is employed in many medical practices and clinics for prophylactic or adjuvant treatment. In sports, it provides valuable services in training support and regeneration. Its greatest use, however, is in permanent application at home. Daily BEMER use in combination with the sleep

program achieves the best result. It is one of the most effective treatment options for an intact organism in the support of microcirculation with only **2x8 MINUTES** of daily application. So simple, yet so good for your health.

## WHEN WILL YOU TEST THE HEALTH OPTIMIZER?

BEMER has been used millions of times all over the world and enjoys a large and ever-growing number of highly satisfied users. When do you want to discover BEMER? For yourself. For your health. For the whole family. With BEMER you are making the right decision. A decision for well-being and health. A decision you won't regret. Because everything else adds up. The 3-year warranty, for example, or the personal and friendly support by

the specialists in the Customer Care Center and the Technical Service Center. And don't forget: The attractive financing offers that can be customized to your personal situation. You see: There is no reason to deprive your health of BEMER. Contact your nearest BEMER consultant or find out more directly from us.

## RESEARCH OUT OF PASSION PRODUCTS OUT OF CONVICTION

Faith alone cannot convince anyone in science and medicine. This is why since our company's founding we have spared no effort to scientifically investigate, prove and further develop the effect of our products. Success proves us right. Since the company's founding we have grown from one small office to a corporate group active worldwide with several thousand sales partners. The term "worldwide" is not quite right. After all, we have also caught Washington's attention. Thus, NASA and BEMER have agreed on a partnership within the framework of which the prototype of a spacesuit is to be developed. Just as important: **We have over 1 million satisfied users worldwide. Imagine what BEMER can do for your well-being. Try it out.**
